

IDEALCAST BATHS

Due to the manufacturing process, air pockets may be visible on the external surface of this product.

Please follow the recommendations below for priming and painting.

The internal surface (bathing area) of the bath must be protected at all times.

Preparing and painting the exterior surface of the bath:

It is recommended that the exterior surface is lightly sanded to provide adequate adhesion for the primer.

De-grease the surface using an appropriate cleaner such as sugar soap. Prepare the surface for painting by using a general primer, obtainable from any general hardware store.

The bath is now ready to apply the preferred finish.

For all paint finishes follow the paint manufacturers instructions.

Any further advice can be obtained by contacting our customer care team.
